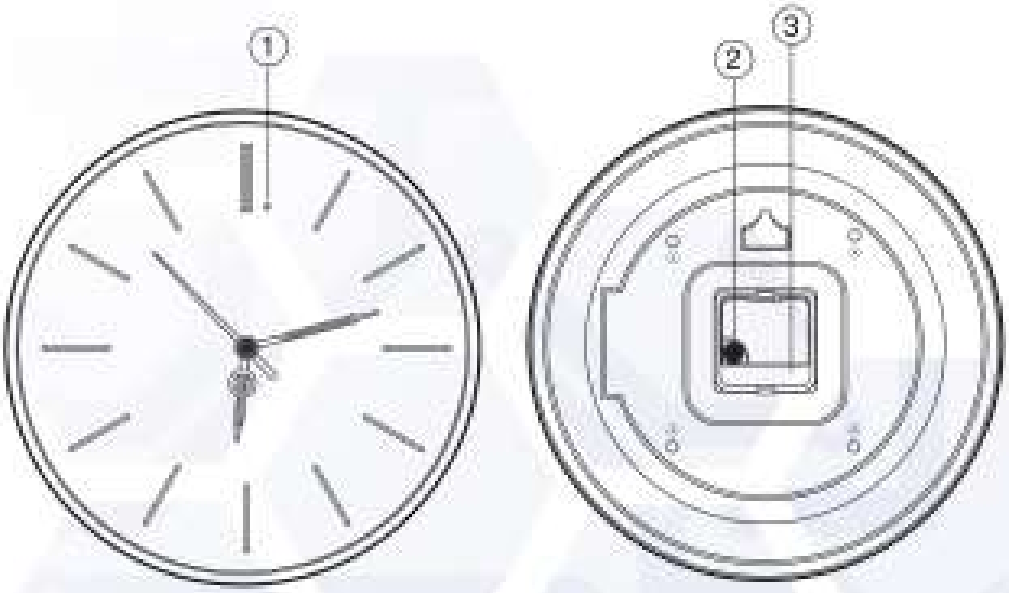
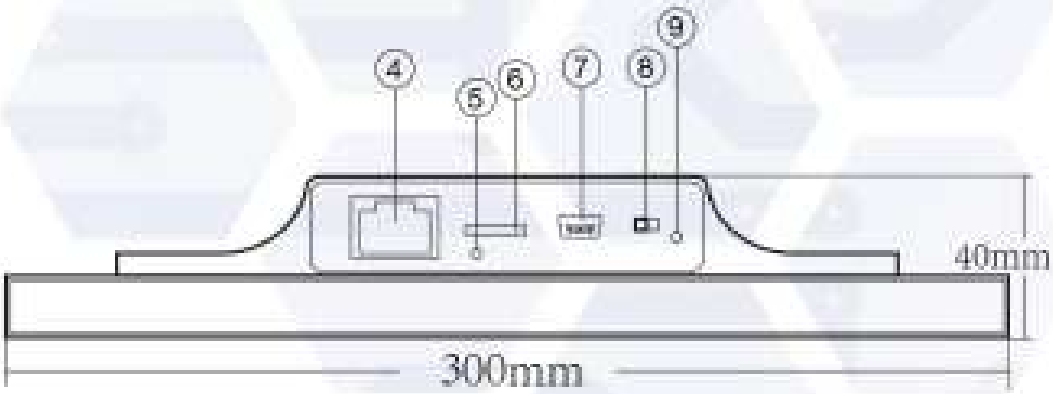
Overview

Clock Diagram



① Camera
③ Clock battery

② Time gear



④ Lan port
⑤ Reset
⑥ Micro SD card slot

⑦ USB port
⑧ ON/OFF (For Wi-Fi Camera)
⑨ LED indicator. To turn on or off see page 11

CAMERA SETUP

Step1: Download and install **HDSmartIPC** APP

Scan below QR code or search and download free APP named “**HDSmartIPC**” in Apple APP store, Google play or Electronic market, and install it.

HDSmartIPC

Step 2: Turn on device and connect power

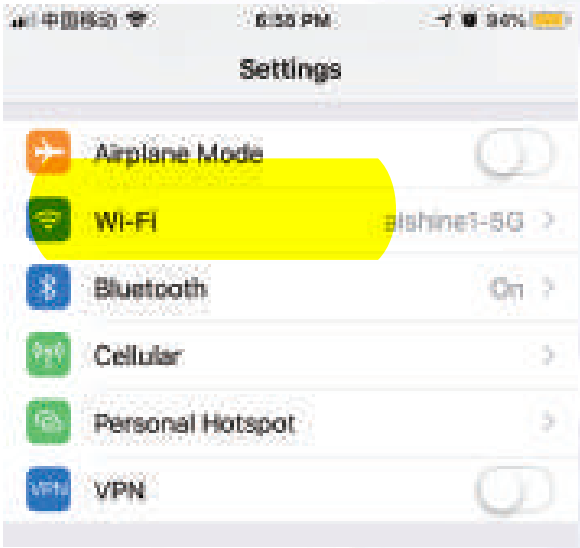
Plug the WeahterStation to the AC if the battery is low.

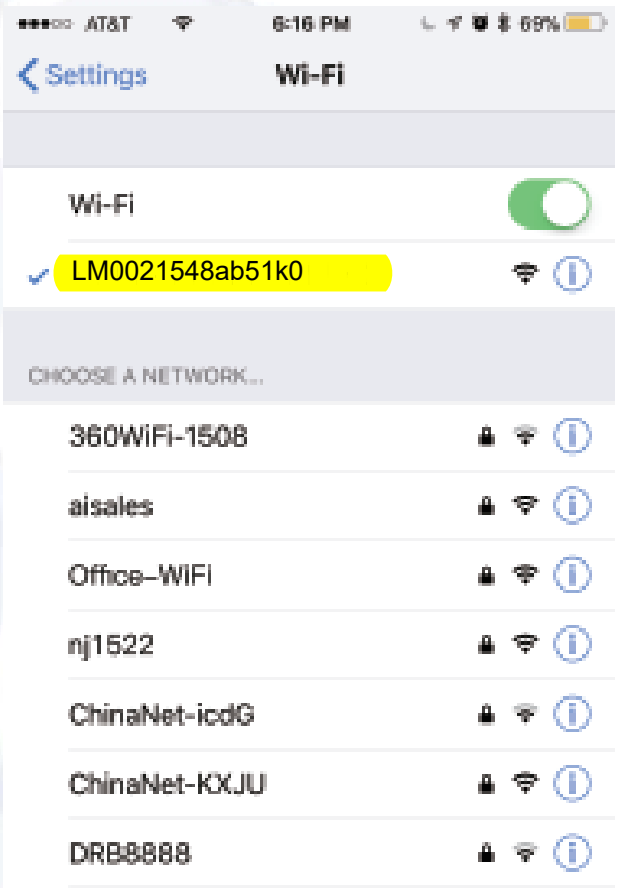
Turn on the unit by sliding the ON/OFF switch on the side to the ON position to turn on the WiFi, a blue indicator light will come on, wait one minute for the WiFi to establish a transmition.

Step 3: Connect Wi-Fi

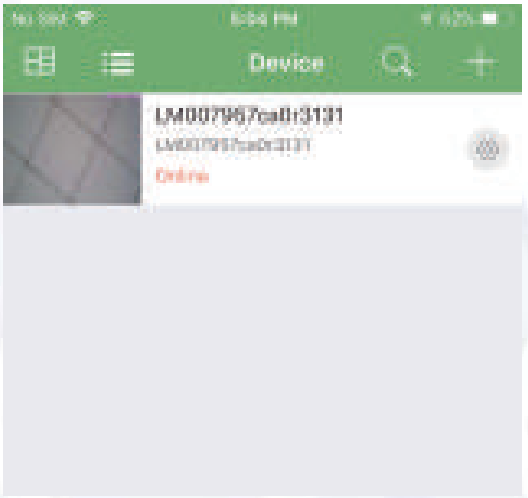
Open your smartphone settings, search and connect the device's wireless signal name starting with the

letters "LM…" or "AI...",wait for Wi-Fi to connect, and phone status bar shows the Wi-Fi symbol in blue.

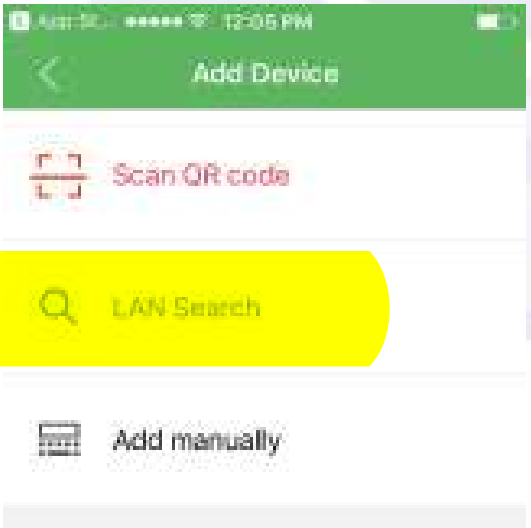


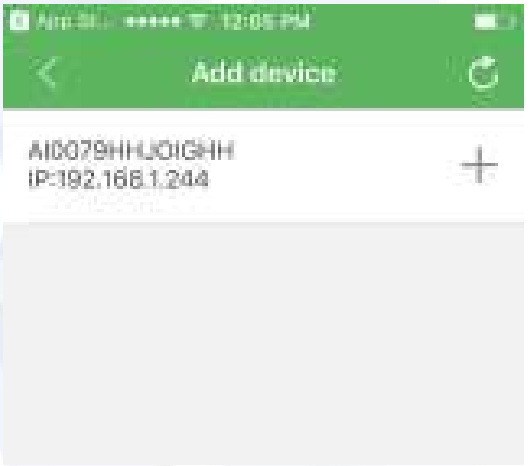


Enter the App, and the app will add just the connected camera automatically.

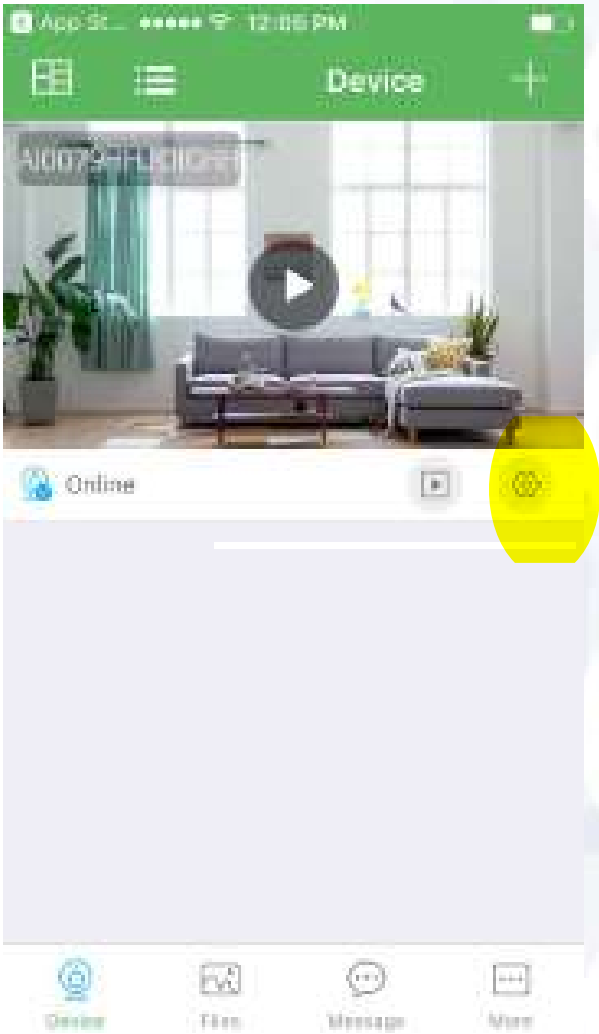


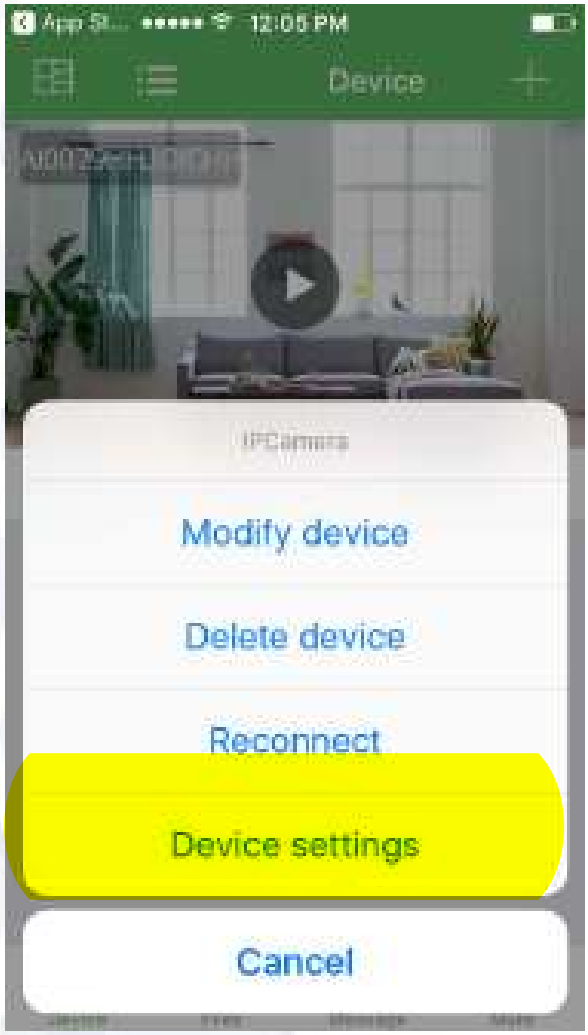
if you dont see any listed press the plus sign (+) to add a new camera. On the next screen hit **LAN search** device, then you will be shown a list of all detected cameras. You should see at least one. Hit **Add** to add the camera



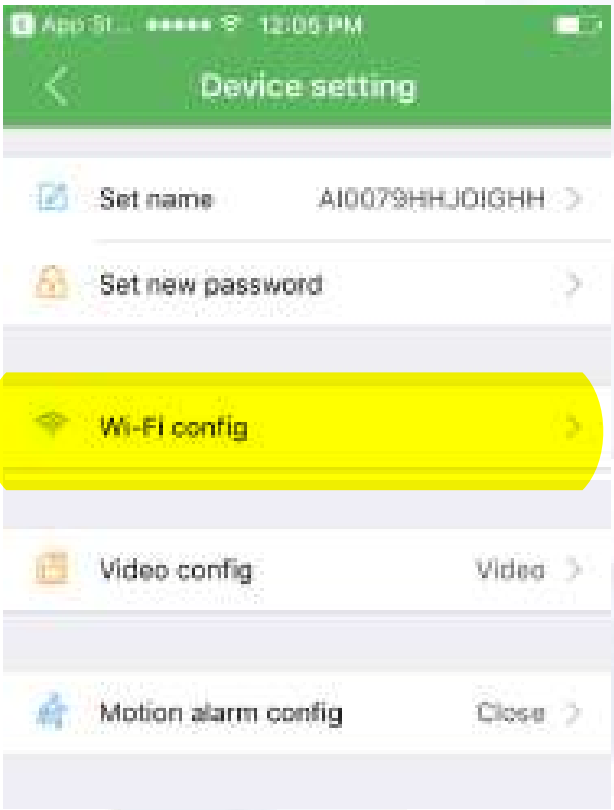


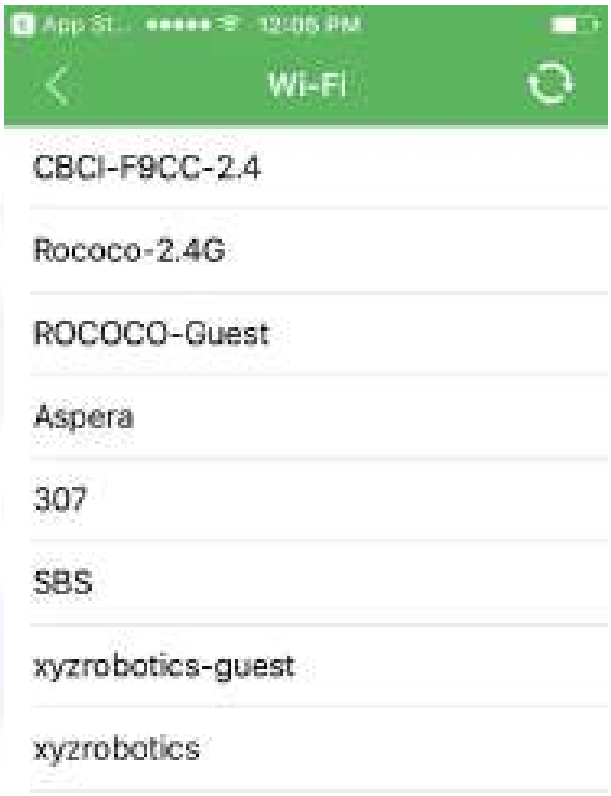
Back on the App's main screen you will see a video preview display of the added camera. Press the gear icon to open settings then select **Device settings**.





Select **Wi-Fi Config** (**Network configuration** on Andoid phones) then look for your local WiFi network name (**SSID**). You will be prompted for your local network **Password**. The App will now connect to the camera.





Quit and restart the App, and the device will start up with the WiFi connected within 30 secods.

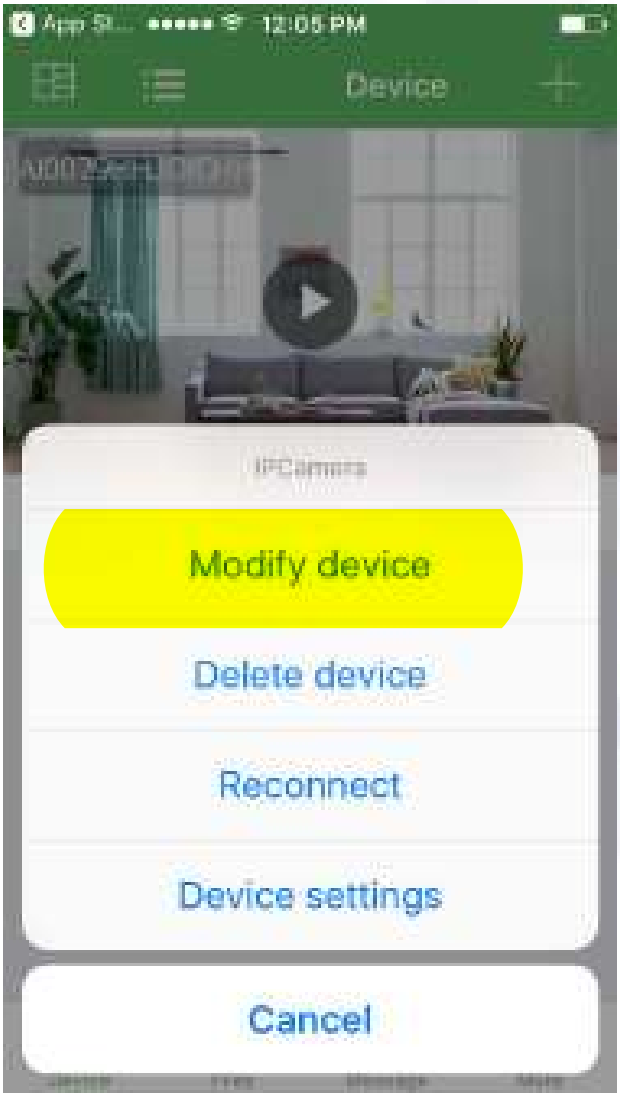
You can now go back to your phone settings as in page 7 and connect your phone back to your local network.

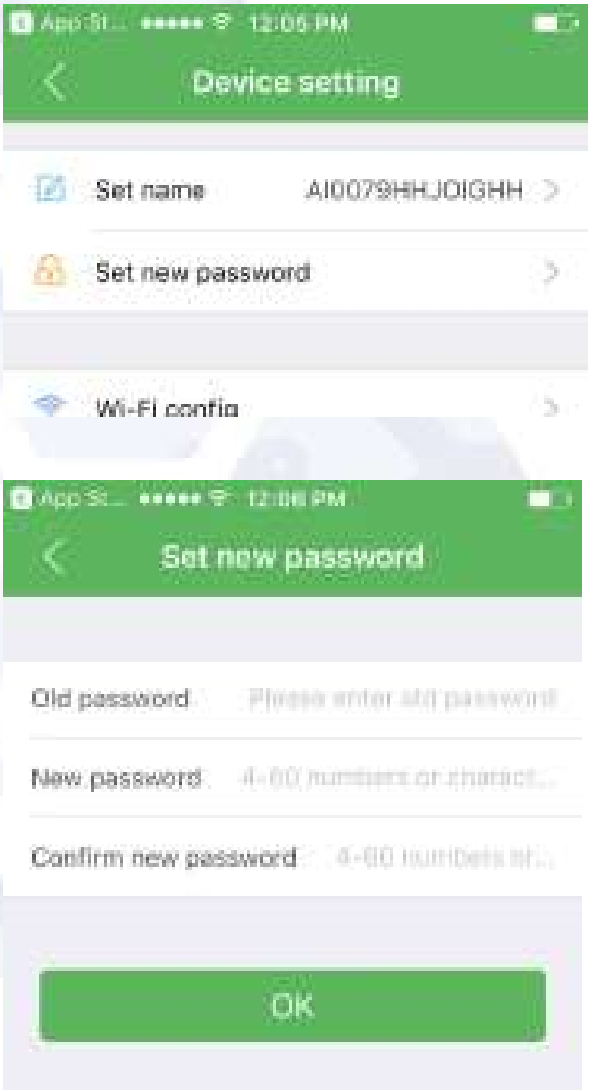
The app will now stream live videos from anywhere as long as your phone has internet access.

Seting up camera name and password:

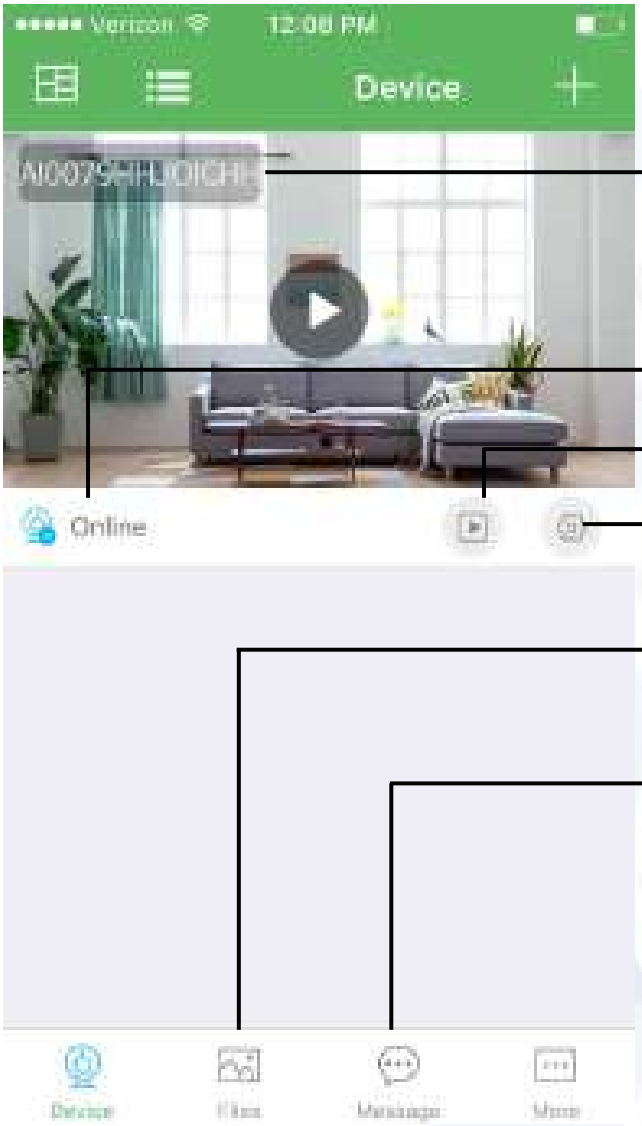
Hit the gear icon below the camera view, then select **Modify Device**, you will be prompted to **Set name**, choose a new camera name, then set the **Set new password**.

The Default (old) password is **8888**. Enter your desired password, and hit **OK**.





USING THE APP



Camera UID / Name

Camera status

Recorded videos in memory card

Camera setting

Files: Snapshots and Recorded videos

Message: Alarm messages (Please insert micro sd card to get alarm pictures)

Live playback view:

Advanced features:

Camera info: Camera ip address, Mac address, Reboot...

TIPS:Each setting in Device Settings, please scroll down and press ok to save the setting.

LOCAL RECORDING

Media can be recorded to a memory card installed on the device. First make sure that you have a MicroSD memory card installed in the WeatherStation.

Hit the gear icon below the camera view to go into **Device settings** then select **MicroSD Card Config**, on Android phones look for **TF card set**.

You have the option to format the memory card, record at all times, record at specified intervals, or stop the recording.

Recording lengh is the maximum video file segments lengh

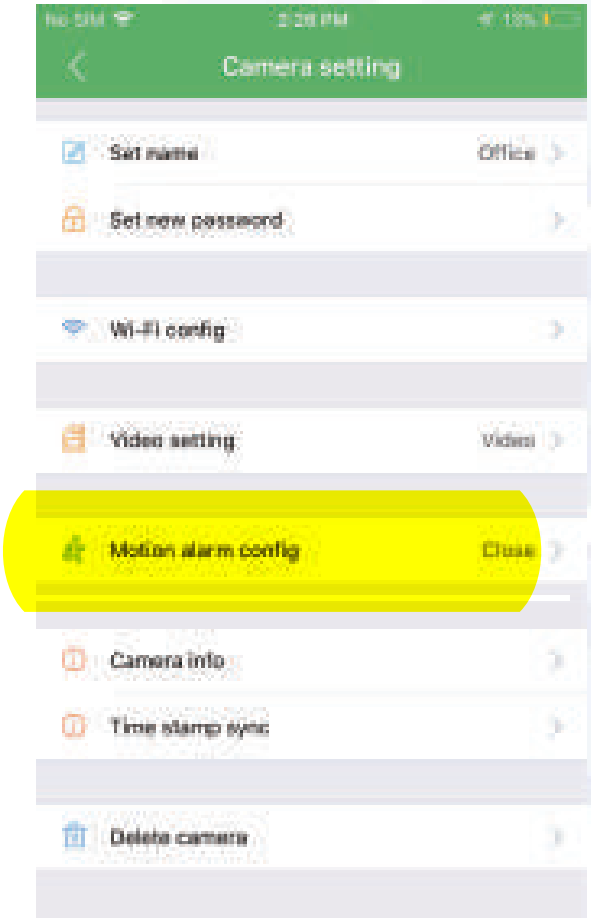
Alarm video will record locally when motion is detected and alert you on your phone. Please refer to the next section on this manual to set up alarm notifications.

ALARM NOTIFICATION

Alarm rnotification will sent you a notification and record a snapshot when the camera detects motion.

Under **Device settings** choose set **Motion Alarm config** and set **Motion detection** to ON.

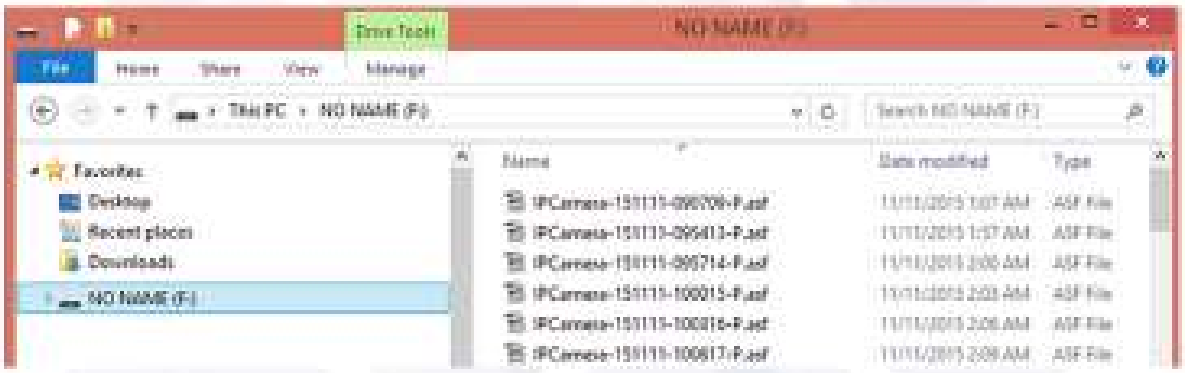
Alarm interval is the time it should continue to record after motion trigger.



To record the video on Alarm, please refer to the previus section.

Playback on PC

Videos can be reviewed and copied to a hard drive by removing the micro SD card from the camera and inserting it into a computer. It will come up as a removable drive and all the files can be accessed by opening the folder.



For playback we currently recommend a free program called VLC Player, found at

www.videolan.org

Zetronix is NOT AFFILIATED with www.videolan.org

Specifications

Sensor	**2 Megapixel CMOS**
