

100% Wire-Free:
Free Of Ugly cords
and wiring hassles

Night Vision: See what's
happening even in the dark

HD Quality: Enjoy
amazingly sharp
1080P live video

Wi-Fi: 802.11 b/g/n wireless
network

**Micro SD :Memory
Card max up to 128GB
(Not included),
8GB 400 days videos**

Motion Alerts: Receive push
notifications if anything moves

Built-in 6000mA battery:
Battery supports to
standby 6-8 months

Fast Response: 1 second enable
recording even at standby mode

Low Power Consumption:
200uA at standby mode

4.Specification

Camera	
Built-in image sensor	1/3" progressive CMOS sensor
Sensor sensitivity	1.0 Lux
Focal Length	0.6 mm or 2.8mm(For Selected Model)
Angle of View	60° or 128° (For Selected Model)
Video Spec	
Algorithm	H.264, JPEG
File Format	AVI,JPEG
Video recording mode	PIR motion recording mode
Recording capability	1920x1080P
Frame rate	Up to 15 fps
Night vision	Up to 5 meters (16.4ft)
PIR detect distance	5 meters (16.4ft)
PIR boots up	In 1 seconds
Video file length	10-60 seconds option
Audio	
Microphone	Disabled
Speaker	Not available
WiFi Spec	
WIFI	Built-in WiFi Module(IEEE 802.11b/g/n)
Storage	
Memory type	Micro SD Card (Support SDHC max=128GB,not included)
Misc	
Date/Time Table	YYYY/MM/DD, HH:MM:SS
Snapshot	Recording
Power	
Power	Input DC 5V
Power Consumption	200uA in standby,190mA-220mA in recording(WiFi), 590mA-650ma mA WiFi +Night vision
Charging Time	24 hours(5V 2A)
Battery Input	DC 3.7V/6000 mA high polymers battery
Battery Lifetime	6-8 months in PIR standby

Recording time	400 days@1280*720p (8GB micro SD card not included),base on 10 detecting files per day
Push alarm notification	Motion detected alarm,Low battery
Product Dimension	12.8*10*4.6cm(5x3.9x1.8INCH)
Others	
App name	Yiye
Mobile surveillance	iPhone, Android
Remote access	Yes
View Angle	Bottom or Side view
Indoor/outdoor usage	Indoor

5.Charging the battery

This unit has a built-in rechargeable lithium battery. When using the unit for the first time,please charge it 24 hours. Open the device (Picture#1),make the USB power cable connected with charger seat and insert the charger into the electrical outlet (Picture #2). The Green LED indicator will be blinking slowly,until charge 24 hours fully.

(Note:There is no LED indicator displayed during charging for the first 20 minutes when battery is ran out completely.)

6.Format Memory Card

There are two ways to format the memory card.

- 1).Format the card on computer.
- 2).Insert micro SD card into memory card slot. Go to Yi eye app to format. More information ,please refer to **9.5 Playback&Share Videos and Photos** in user manual.

7.LED Light State Introduction

No.	LED Status	Device Status
1	Slowly blinking green	Charging power for battery
2	Slowly blinking red within 180 seconds	Power on device ,to be connecting to WiFi
3	Fast blinking green 11 times, change to solid green 10 seconds	Power on device ,WiFi connected
4	Fast blinking red 5 times	Device power off
5	Solid green	Device abnormal, press and hold the Reset button for 30 seconds, then release

8.Preparation

This device can support remote viewing on both IOS and Android devices.

- 1).IOS:Log-in to the Apple "APP store" and search for "Yieye".
- 2).Android:log-in to Google "Play store" and search for "Yieye".

You may also scan the QR code below that corresponds to your mobile operating system to download and install app.

Apple store: Yieye

Google Play: Yieye

YOU NEED TO KNOW BEFORE SETUP:

1. Make sure you are using 2.4GHz wireless network, not 5GHz
2. Make sure the RED LED light is blinking slowly when power on. if not, please reset the camera.
3. Make sure your camera and wifi router are not far away.

4. Make sure your phone is close to the camera when configuring.
5. Go to Wi-Fi setting of your smartphone to see if camera ID like YIEYE-XXXXXX-XXXXXX is matched with the one we put the sticker on the device
6. Make sure your Wi-Fi SSID do not contain any symbol or special characters.
7. Make sure your camera is charged up to 30 hours for the first time use.

9.Start using the device Wi-Fi Configuration

Step 1 Place the dummy smoke detector security camera on a flat surface close to home router along with user's mobile phone, slide the ON/OFF switch to On position. Red LED blinks within 180 seconds.

Note:It only support 2.4Ghz internet Wi-Fi network,no 5G network.

Step 2 Wait a full 40 seconds for the device to boot up, then enter Setting on the phone, select Wi-Fi, scan and join the network of Wi-Fi router.

Note:
