General Troubleshooting

Most issue can be solved by formatting the the device. This will delete all stored and recorded files.

First back up all your files stored in the device and then, to format connect the device or the memory card to your computer and use Windows or MacOS native format utility. For more information on how to format please search online.

Once formatting is done you can copy the default backed files (Time Syncronization Tools) back onto the device.

Unable to connect it to the computer via the USB cable, or computer not detecting it.

First check if the plug is in place. If the computer still does not respond, try to switch to a different computer connection. Some computers cannot be recognized because of the lack of a driver. If you still can't identify it after you try it, you can contact after-sales upgrade or after-sales service.

Plug in the earphone to boot but not enter the play state?

Insert the earphone, then turn on the device, after the light blinks for a few seconds and then goes off, turn off the device. When the red light comes back on, turn the device ON again, and then you will be in the playback state.

This recorder comes with a smart reset system. Please save the file being recorded before connecting to the computer. Due to the high recording quality and clear sound parameters of this product, the recording file is relatively large. Please back them up often. Zetronix is not responsible for the loss of data.

Playback format	MP3/WMA/WAV	Sampling	48KHz
Recording bit rate	192KBPS		

Charging

1. Plug the data USB into the device's USB port socket and connect it to your computer or USB charger for charging. It is recommended to connect the voice recorder to the computer with a USB cable.
2. Use a power adapter with a charging current of 1A or less to charge it, otherwise it may damage the voice recorder or cause a hazard (this product does not come with a power adapter).
3. In the charging state, the red light is on while charging, once fully charged it will start blinking.

Precautions

1. When charging or connecting to the computer, first turn off the device. When unplugging, wait until the light is off before using it.
2. After finish recording, no matter whether the recorder has power or not, you must turn off the device so the recording is saved, otherwise the recording file will be lost.

Note:
★ **Do not place this product in a heating device or in a high temperature environment.**
★ **Please use the charger with a current of 1A or less to charge the computer.**
★ **This product uses flash memory to store data, please backup the required data on the computer or other storage devices often. If the product is damaged or cannot be read/recognized, Zetronix is not responsible for the loss of data.**
