

# EyeWatch

Hidden Camera Wrist Smart-Watch

USER MANUAL

# Product Design & Function

## Turning device on/off:

Press the ON/OFF button to view the time.

Press and hold the ON/OFF key for 3 seconds to power on.  
The watch will start in a video record stand-by screen.

To enter the screen saver, hit the ON/OFF button again.

Hitting it a second time will turn off the screen.

## Recording Video:

While in standby, press the REC button.

The gray heart symbol turns red, indicating video is recording.

**NOTE:** Videos are recorded in 10 minute file segments, once the memory storage is full, the oldest file segments will be replaced with new ones.

During the recording process, press the REC button again to pause the recording. The red heart symbol turns gray, indicating recording has paused and the video file has been saved.

The watch will then re-enter the stand-by mode.

Press the ON/OFF button to shut down watch camera device, or it will shut it self off after 2 minutes.

## Video Time-stamp & settings.

By default, a date & time is stamped on the video. To change the time and other options, you will need to edit the userconfig.txt file already stored in memory.

Connect the watch to your computer to find the Userconfig.txt, open in it in a text editor, set the corresponding parameters as shown below, save the file, disconnect from computer and restart the watch.

 Userconfig.txt Sample settings:

```
dat:1
res:0
cyc:1
year:2023
mon:08
day:02
hour:15
min:22
sec:30
```

Example configurations:

dat: time stamp watermark; 0 = OFF,1 = ON

res: Video resolutions; 0: 1080P(1920x1080), 1: 720P(1280x720), 2: VGA(640x480)

cyc: Loop video setting; 0= close, 1 = open

year: Two digit year; 24 = 2024, 25 = 2025

mon: 01 to 12 two digit month; 09 = September, 12 = December

day: 01 to 31 two digit day; 02 = the second of the month

hour: 00 to 23 two digit hour; 02 = 2AM, 16 = 4PM

min: 00 to 59 two digit minutes;

Sec: 00 to 59 two digit seconds;

Disconnect watch from computer and restart it to apply changes.

## Product Specifications

Dimension	48mm*40mm*12mm
Weight	40g
Display screen	1.4 inch IPC
Display resolution	240x240
Video format	AVI
Play software	Operating system or mainstream audio and video player software. VLC recommended; <b><a href="https://videolan.org">https://videolan.org</a></b>
Frame rate	30 fps
Video resolution	1920X1080P
Storage medium	Built-in storage
Data interface	usb 2.0
Microphone	360°non-directional microphone
Camera lens	Camra 1054 H42
Operating temperature	-10°C~40°C
Adapter	DC5V/1A
